|---------------------------------|---|
| Name of the material | Craters and Meteorites |
| Target group | 3 – 8 and 9 – 12 year olds |
| The type of the material | A work instruction |
| Description | Have you ever heard someone say that the moon is made of cheese? Even though the craters on the surface of the moon resemble holes in Swiss cheese, we know that this common myth is not true. Find out how craters are formed and why they are different sizes by doing this simple science project. |
